CHEMISTRY

## PREFACE

Germany has a long-standing tradition of excellence in chemistry education and research. This brochure provides an insight into research in Germany in the field of chemistry and is especially recommended to early career researchers from abroad.

Chemical research in Germany is primarily conducted at universities but also at non-university research institutions. Almost all universities and many universities of applied sciences host a chemical research section. The spectrum ranges from small monothematic working groups to large interdisciplinary departments and covers a variety of topics from traditional areas to new explorative research fields.

This brochure is intended to give an initial overview. The following map and tables highlight research consortia and graduate training programmes at universities and non-university research institutes with a main focus on chemical research.

On top of this, there is a lot more to discover: e.g. the DFG funds a multitude of individual projects in chemical research. These individual grants outweigh the research consortia both in number and in overall funding volume. Towards the end of this brochure, you will find a link to the online database GEPRIS that provides an overview of all DFG funded research projects. You will also find additional important links for further information about programmes in the field of chemistry and profiles of German universities and research institutions.

We invite you to explore the many opportunities that Germany has to offer and welcome your feedback.

# OVERVIEW

- Graduate Schools
- Research Training Groups
- International Research Training Groups
- Integrated Research Training Groups in Clusters of Excellence
- Integrated Research Training Groups in Collaborative Research Centres/Transregios
- Clusters of Excellence
- Collaborative Research Centres/Transregios

DFG funded Priority Programmes and Research Units are not shown on the map since they are not necessarily located at a single location; they are listed on pages 13 and 15.

# CENTRES OF RESEARCH

- FUNDED BY DFG -

**Clusters of Excellence (EXC)** were established at universities in the framework of the German Excellence Initiative and promote cutting-edge research. Their objective is to engage in scientific networking and collaboration in research fields of particular promise for the future. They also offer excellent training conditions and career opportunities for early career researchers.

**Collaborative Research Centres (CRC)** are organisational units established at universities which enable researchers to pursue an outstanding research programme crossing the boundaries of disciplines, institutes, departments and faculties. The traditional Collaborative Research Centre is generally applied for by one university and is conducted by researchers of that university. Early career support is a key objective of the Collaborative Research Centre Programme. Early career researchers may get involved in a CRC in numerous ways, for example within the framework of an Integrated Research Training Group. Collaborative Research Centres are funded for a period of up to 12 years.

**Transregios (TRR)** are Collaborative Research Centres in which up to three universities collaborate with each other and submit a joint application. The contributions of the cooperative partners are essential, complementary and synergistic to the joint research objective. Funding facilitates close, nationwide collaboration among the participating universities and researchers, as well as networking and shared use of resources. There is also the option of international Transregios.

## CENTRES OF RESEARCH

Location	Institution	Title	Funded Since	Contact
<b>CLUSTERS OF EXCELLENCE</b>				
Aachen	Rheinisch-Westfälische Technische Hochschule Aachen	Tailor-Made Fuels from Biomass (TMFB) (EXC 236)	2007	<a href="http://www.fuelcenter.rwth-aachen.de">www.fuelcenter.rwth-aachen.de</a>
Berlin	Technische Universität Berlin	Unifying Concepts in Catalysis (UniCat) (EXC 314)	2007	<a href="http://www.unicat.tu-berlin.de">www.unicat.tu-berlin.de</a>

# RESEARCH UNITS

-FUNDED BY DFG-

**Research Units (FOR)** often contribute to establishing new research directions. Research Units are made up of a team of researchers working together on a research project which is often of an interdisciplinary nature. Research units consist of several researchers and subprojects. The subprojects of a Research Unit are often located at several locations throughout Germany. Research Units are generally funded for up to six years.

Research Units are not shown on the map. Only the titles of the thematic focus and the project websites are listed.

## RESEARCH UNITS

Title	Funded Since	Contact
Integrierte Chemische Mikrolaboratorien (InCheM) (FOR 2177)	2015	<a href="http://analytik.chemie.uni-leipzig.de/start/dfg-for-2177/start/">http://analytik.chemie.uni-leipzig.de/start/dfg-for-2177/start/</a> (DE)
Nanoporous Gold - A Prototype for a Rational Design of Catalysts (FOR 2213)	2014	<a href="http://www.uni-bremen.de/en/mapex/research/coordinated-research-programs.html">www.uni-bremen.de/en/mapex/research/coordinated-research-programs.html</a>
Acting Principles of Nano-Scaled Matrix Additives for Composite Structures (FOR 2021)	2014	<a href="http://www.tu-braunschweig.de/iaf/forschung/forschung/wirkprinzipien/index.html">www.tu-braunschweig.de/iaf/forschung/forschung/wirkprinzipien/index.html</a>
Multi-Functional Conversion of Chemical Species and Energy (FOR 1993)	2013	<a href="http://www.uni-due.de/for1993">www.uni-due.de/for1993</a>
Exploring the Dynamical Landscape of Biomolecular Systems by Pressure Perturbation (FOR 1979)	2013	<a href="http://www.ccb.tu-dortmund.de/fb03/for1979">www.ccb.tu-dortmund.de/fb03/for1979</a>

Intermolecular and Interatomic Coulombic Decay (FOR 1789)	2012	<a href="http://www.icd.uni-frankfurt.de">www.icd.uni-frankfurt.de</a>
Chemistry and Technology of the Ammonothermal Synthesis of Nitrides (FOR 1600)	2011	<a href="http://www.ammono-for.org">www.ammono-for.org</a>
Hydrogen-Bonded Liquids Subject to Interfaces of Various Hydroaffinities (FOR 1583)	2011	<a href="http://www.fkp.tu-darmstadt.de/groups/for_1583">www.fkp.tu-darmstadt.de/groups/for_1583</a>
Organic-Inorganic Nanocomposites through Twin Polymerization (FOR 1497)	2011	<a href="http://www.zwipo.tu-chemnitz.de">www.zwipo.tu-chemnitz.de</a>
Dynamics of Electron Transfer Processes within Transition Metal Sites in Biological and Bioninorganic Systems (FOR 1405)	2011	<a href="http://www.biocdyn.uni-paderborn.de">www.biocdyn.uni-paderborn.de</a>
Exploiting the Potential of Natural Compounds: Myxobacteria as Source for Leads, Tools, and Therapeutics in Cancer Research (FOR 1406)	2010	<a href="http://www.for1406.uni-muenchen.de">www.for1406.uni-muenchen.de</a>

# PRIORITY PROGRAMMES

- FUNDED BY DFG -

**Priority Programmes (SPP)** have a programmatic focus and the purpose of advancing knowledge in an emerging field of research through collaborative networked support. They are characterised by their enhanced quality of research through the use of new methods and forms of collaboration in emerging fields. As a rule, one programme can consist of up to 30 individual subprojects located at several institutions across Germany; it usually has one coordinating person. Priority Programmes normally receive funding for a period of up to six years.

Priority Programmes are not shown on the map. Only the titles of the overall themes and the project websites are listed.

## PRIORITY PROGRAMMES

Title	Funded Since	Contact
Chemical Biology of Native Nucleic Acid Modifications (SPP 1784)	2015	<a href="http://www.spp1784.uni-mainz.de">www.spp1784.uni-mainz.de</a> (DE)
Control of London Dispersion Interactions in Molecular Chemistry (SPP 1807)	2015	<a href="http://www.uni-giessen.de/cms/fbz/fb08/dispersion">www.uni-giessen.de/cms/fbz/fb08/dispersion</a>

# NON-UNIVERSITY RESEARCH INSTITUTIONS

**Fraunhofer Society** is one of the world's leading organisations for applied research with an annual research budget of 2.1 billion euros, 67 institutes and more than 24,000 employees. Fraunhofer's R&D portfolio covers a wide range of fields, including health, security, communications, transport, energy and the environment. [www.fraunhofer.de](http://www.fraunhofer.de)

**The Helmholtz Association** contributes to solving major challenges facing society, science and industry with world-level research in six areas: energy, earth and environment, health, key technologies, structure of matter and aeronautics, space and transport. With more than 38,000 employees in 18 research centres and an annual budget of approximately 4.24 billion euros, the Helmholtz Association is Germany's largest scientific organisation. [www.helmholtz.de](http://www.helmholtz.de)

**The Leibniz Association** is an umbrella organisation of 89 research institutes. The annual budget amounts to 1.73 billion euros. Some 9,300 researchers – more than 1,100 of them from abroad – work on a widely diverse range of subjects, including the humanities and social sciences, economics, spatial and life sciences, mathematics, natural and engineering sciences and environmental research. [www.leibniz-association.eu](http://www.leibniz-association.eu)

**The Max Planck Society** for the Advancement of Science is one of Germany's largest independent non-profit research organisations. The Max Planck Society has been allocated approximately 1.8 billion euros for 2016. A combined total of more than 13,000 researchers, postdoctoral/junior researchers and visiting researchers at 83 Max Planck Institutes conduct basic research in the natural sciences, life sciences, social sciences and humanities. One third of the researchers and more than half of the junior and visiting researchers come from abroad. [www.mpg.de](http://www.mpg.de)

# GRADUATE TRAINING

- FUNDED BY DFG -

**Graduate Schools (GSC)** were established at universities in the framework of the German Excellence Initiative. Their objective is to provide training and qualification for outstanding doctoral students from Germany and abroad within an excellent research environment. They serve as an instrument of quality assurance in promoting early career researchers and offer large networks that cover wide areas of research.

**Research Training Groups (RTG)** combine an ambitious research programme at universities with comprehensive training, tailored supervision and academic freedom to form an ideal environment for a successful doctorate. Research Training Groups can also have an interdisciplinary approach. They are funded for a period of up to nine years.

**International Research Training Groups (IRTG)** provide opportunities for joint doctoral training programmes between German universities and universities abroad. The research and study programmes are jointly developed and supervised. Doctoral students in the programme spend six months at the partner institution.

**Integrated Research Training Groups** (within Clusters of Excellence or Collaborative Research Centres/Transregios) offer ideal research environments for doctoral researchers. The main aim of these structured training programmes is to provide young scientists and academics with opportunities to independently carry out research at an early stage of their career. The programmes further take care to closely integrate early career researchers into an academic network. Working in Clusters of Excellence or Collaborative Research Centres projects, doctoral researchers achieve additional qualifications. As research assistants in these projects, they contribute to the Research Centre's success. They are closely involved with the projects and have access to the entire project infrastructure.

## GRADUATE TRAINING

Location	Institution	Title	Funded Since	Contact
<b>GRADUATE SCHOOLS</b>				
Berlin	Humboldt-Universität zu Berlin	School of Analytical Sciences Adlershof (SALSA) (GSC 1013)	2012	<a href="http://www.salsa.hu-berlin.de">www.salsa.hu-berlin.de</a>
Darmstadt	Technische Universität Darmstadt	Darmstadt Graduate School of Energy Science and Engineering (GSC 1070)	2012	<a href="http://www.eso.tu-darmstadt.de">www.eso.tu-darmstadt.de</a>
Göttingen	Georg-August-Universität Göttingen	Göttingen Graduate School for Neurosciences and Molecular Biosciences (GGNB) (GSC 226)	2007	<a href="http://www.uni-goettingen.de/en/56640.html">www.uni-goettingen.de/en/56640.html</a>

Bochum	Ruhr-Universität Bochum			
Darmstadt	Technische Universität Darmstadt			
■ Halle/Saale	Martin-Luther-Universität Halle-Wittenberg	Research Training Group "Polymers: Random Coils and Beyond" within: Polymers under Multiple Constraints: Restricted and Controlled Molecular Order and Mobility (CRC/ TRR102)	2011	<a href="http://www.natfak2.uni-halle.de/forschung/verbund/sfbtrr102">www.natfak2.uni-halle.de/forschung/verbund/sfbtrr102</a>
Leipzig	Universität Leipzig			

## GRADUATE TRAINING

# GRADUATE TRAINING

## -AT NON-UNIVERSITY RESEARCH INSTITUTIONS-

**Helmholtz Graduate Schools** provide a roof under which a varied number of curricula in different fields, or across disciplines, can find a home. Helmholtz Graduate Schools constitute a valuable addition to the wide range of training programmes available within the Helmholtz Association. They offer optimal conditions for PhD students to work and enable them to create a network of contacts with fellow university researchers while also fostering the integration of participants into the research environment.

**Leibniz Graduate Schools** were established to foster the systematic promotion of junior researchers. Young researchers are given the opportunity to do their doctorates in an excellent, collaborative, cross-disciplinary research environment. To this end, Leibniz institutions cooperate closely with universities. As every Leibniz institution focuses on clearly defined, socially-relevant themes, doctoral candidates have a wealth of networking opportunities in a large, dedicated scientific community. The particular character of research at the institutions in the Leibniz Association, which includes fundamental, large-scale and application-oriented research, means doctoral candidates can conduct research from basic idea right through to application.

**International Max Planck Research Schools (IMPRS)** offer talented German and international junior scientists the opportunity to earn a doctorate under excellent research conditions. The research schools are established by one or several Max Planck Institutes. These IMPRS work in close cooperation with universities and other – sometimes international – research institutions. This provides an extraordinary framework for the graduate students to work in, and is a great advantage in interdisciplinary research projects, or in projects that require special equipment.
