Medical Technology in Cologne and Bonn

A Guide to the Competencies of the Medical Industry

Dear Reader,

The medical technology industry in the Cologne/Bonn region is a continuously growing sector with highly interested and motivated companies. The Chamber of Commerce and Industry in Bonn/Rhine-Sieg, the Chamber of Commerce and Industry in Cologne, and the association of the HealthRegion CologneBonn are working together to offer support in this sector.

We look forward to providing you with an overview of this sector with the Guide to Medical Technology in the Cologne/Bonn Region and facilitating your search for products, cooperative partners, and business associates in the region. The purpose of the Guide is to enhance national and international perception of medical technology from this region and to support cooperative work abroad. Moreover, the guide is supposed to promote the networking and cooperative work of regional businesses as well as scientific research on location and to support start-up businesses.

In the following, each company that participated in the first edition has presented a brief description of itself and its areas of expertise. If you also belong to the medical technology sector from this region or have a relevant expertise, e.g. as a manufacturing company, and would be interested in an entry in this guide, please enter your company data free of charge on the website **www.medtech-rhineland.de**.

Finally, all three partners continuously provide events for thematically related communication among medical technology companies from the region. Please contact us with your questions or refer to information on the website of the HealthRegion CologneBonn (Gesundheitsregion KölnBonn e.V.) under www.health-region.de.

Sincerely,

Dr. Hubertus Hille

Supervising Managing Director of
the Bonn/Rhine-Sieg Chamber
of Commerce and Industry

Alexander Hoeckle

Director International and Business Support
Section, Cologne Chamber of Commerce and
Industry

Prof. Dr. Wolfgang Goetzke

Managing Board Member of the
HealthRegion CologneBonn

THE LOCATION OF MEDICAL TECHNOLOGY IN THE HEALTHREGION COLOGNEBONN

The health care industry in the Cologne/Bonn region is comprised of a high level of expertise with a strong performance in cutting-edge medical know-how and research. Together, the health care industry and the chambers of commerce and industry in Cologne and in Bonn/Rhine-Sieg foster the development of a location for health care and medical technology. The Health-Region CologneBonn promotes a regional network which organises science, research, industry, and patient services in the sector of medicine and health care for the region.

The close cooperation among research, technology, and outstanding expertise constitutes the basis for the superior location requirements for medical technology companies in the region. Among other things, this is demonstrated by the large number of excellent universities and research institutions or industrial parks such as the university clinics of Cologne and Bonn with programmes in medical technology, the Fraunhofer-Gesellschaft, the German Dementia Centre, the DLR Institute of Aerospace Medicine, the Life Science Incubator and the BioCampus Cologne (a campus for medical

technology, life science, and biotechnology companies) to name only a few.

Medical technology companies, which manufacture and sell innovative products, as well as the metal and plastics industries benefit from these developments in the region. In addition to the outstanding infrastructure of thematically comparable scientific institutions, important networks and political decision-makers are located in the region such as the German Federal Institute of Drugs and Medical Devices (BfArM), the German Federal Ministry of Health (BMG) and the German Healthcare Export Group, as well as a great number of customers, e.g. from in- and out-patient services and the business community economically influenced by senior citizens.

Medical technology made in Germany has an excellent reputation worldwide. In 2014, the export rate from this economic sector was at 68 percent, and a good share of this was contributed by companies from the Cologne/Bonn region.

aks Aktuelle Krankenpflege Systeme GmbH

Manufacturer, Supplier

Rehabilitation, Hospital Equipment, Healthcare Assistance and Retirement Homes, in Rehabilitation Facilities, in Private Homes, for Care-Provision Services, Hospitals and Clinics

Founding Year 1988

Director

Employees 100

Mr Murat Alioglu

Company Information

aks was founded more than 27 years ago as a provider of medical products like anti-bedsore systems, homecare beds and patient lifters. As a manufacturer of high-quality medical products, we are now an internationally-operative Company with more than 100 employees.

Products & Services

We apply our extensive experience in care and assistance in the development of aids for lying, supporting and lifting. The aks-portfolio includes anti-bedsore systems, homecare beds and patient lifters. Our aids are suitable for use in healthcare assistance and retirement homes, in Rehabilitation facilities, in private homes, for care-provision services, as well as hospitals and clinics.

Company Philosophy

We are a market partner of medical suppliers. All activities are commonly coordinated for successful activity in the medical appliances market.

We apply our extensive experience in care and assistance in the development of aids for lying, supporting and lifting. Our central focus is on elderly, ill and disable persons requiring care, as well as their helpers and loved ones. We would like to offer these people optimal, high-quality means to manage their day-to-day lives more easily.

AMEDTEC
Medizintechnik Aue GmbH

AMEDTEC Medizintechnik Aue GmbH

Manufacturer, Dealer

Diagnostics, Rehabilitation, Hospital Equipment, Consumables, IT Network, HIS Connection

Founding Year 1998

Director

Employees 29

Dipl. Ing. Claus Schrödter

Company Information

AMEDTEC Medizintechnik Aue GmbH was founded in 1998 as a development service provider and has grown to a leading specialist for the design and development of cardiological data management systems. Integral components of those systems are the 12-lead resting and stress test ECG, Holter ECG, as well as the ambulatory blood pressure monitoring (ABPM). During its time as a development service provider, AMEDTEC developed hardware and software for leading international manufacturers of 12-lead and Holter ECG systems. Products developed in our house are in use worldwide.

Products & Services

AMEDTEC ECGpro® sets new standards in ECG diagnostics and data communications. From wireless ECG acquisition, over innovative diagnosis programmes, to a sophisticated, highly configurable HIS interface along with its workflow capabilities, all requirements to a modern diagnosis and data management system are fulfilled.

Bomedus GmbH

Manufacturer, Dealer, Service Provider

Intervention/Therapy

Founding Year 2012

Director

Dr. Johannes Weigl, Dr. Tobias Weigl

Company Information

Bomedus was founded 2012 as a Spin-Off from the University Clinic of Bonn (Germany). Core of the company is a new non-invasive electrotherapy named Small Fiber Matrix Stimulation (SFMS) against recurring and chronic musculoskeletal pain. The technology is transferred into different CE-certified products consisting of a textile brace for the specific region and a controlling device.

Products & Services

SFMS/bomedus-technology for lower back pain, upper back pain, neck pain, knee pain, elbow pain and stump/phantom limb pain

Company Philosophy

Three main characteristics determine our company and our daily actions:

- scientifically-based and clinically tested technology
- innovative technology & „out-of-the-box“-way of thinking
- cooperative and fair relationship with customers and partners

Hydrostatische Wasserschiene

Dentrade e.K.

Manufacturer, Supplier

Dental, Rehabilitation

Founding Year 1987
Employees 4
Annual Turnover 830 000 EUR

Director

Mr Peter Bausch

Company Information

Dentrade e.K. is specialized in distributing hydrostatic splint-system for treating the CMD (cranio mandibular dysfunction), which is also known as temporomandibular disorders or temporo-mandibular-Joint-Disease.

Products & Services

The Aqualizer's fluid system creates perfect bite balance and stability through a minimaly invasive approach to TMJ treatment. It works by allowing the muscles to automatically reposition the jaw to where it naturally works best. Restoring this balance is essential for TMJ pain relief. Unlike other available dental splints, the Aqualizer self-adjusting oral splint is a TMJ treatment, which allows the body to unravel bite distortions and establish optimal systemic function and balance. The Aqualizer takes the uncertainty out of TMJ diagnosis and treatment. While other dental splints and TMJ treatment options can distort the jaw, causing TMJ pain, the Aqualizer facilitates relief through ideal occlusion automatically and naturally. The Aqualizer is also a perfect supplement in other medical disciplines besides dentistry. Today this device is integrated into physical therapy, osteopathy, orthodontic treatment, orthopedics and many other medical disciplines.

DESINO GmbH

Manufacturer Rehabilitation

Founding Year 2012

Employees 3

Director

Mr Daniel Levedag

Company Information

DESINO rethought the wheelchair concept entirely. The result is an innovative adaptive wheelchair, which provides dynamic seating as well as a manual hybrid-drive that opens up completely new horizons.

Products & Services

DESINO's patented, dynamic seat activates your spine and relieves your back. After analysing the movement pattern of the human body while walking, we have adapted our seating system accordingly to accommodate in the best possible way. The outcome: A smoothly oscillating, natural sequence of movements, which mobilizes the spine, the muscles and the lymphatic system equally. The movement of the dynamic seat can be adjusted steplessly. Even your arms are involved in the sequence of movements through the ergonomic leverdrive providing the whole upper body with the positive effect.

Gira Giersiepen GmbH & Co. KG

Manufacturer, Supplier

Diagnostics, Materials/Surfaces, Intervention/Therapy, Dental, Design, Consumables, Hospital Equipment, Development, Industrial Engineering, Mould Shop, Injection Moulding, Assembly

Founding Year 1905

Director

Employees 1200

Mr Alfred A. Bulitz

Company Information

Tracing its roots back to the original plastics processing company founded in 1953, Gira Plastics Technology has been active as a system supplier for the medical and pharmaceuticals industries since 2005. The company's many years of experience in the development and production of individual components, complex modules and system products makes the company particularly well qualified for the manufacture of sophisticated medical products. To this end, the company is also audited and certified in accordance with DIN EN ISO 13485. Its production range has also integrated a clean room conforming to Class 7 as defined by DIN EN ISO 14644 and meeting GMP requirements. In all, Gira offers a complete functional range – including construction and tool manufacturing – from the development stage through to series production of thermoplastic and thermosetting components.

Products & Services

The Gira Plastics Technology business sector develops components of medical products, systems and instruments for, among other applications, minimally invasive surgery, cardiopulmonary and diagnostics. To meet the targets like budget, lead time, product costing design to cost approaches as well as applying efficient processes through development and industrialisation period are installed. The clean room set up in 2005 at the Gira Plastics Centre conforms to the guidelines of Clean Room Class 7 of DIN EN ISO 14644. State-of-the-art production and automation technologies allow both the fully automatic production of individual components, as well as the combination of various technologies and the making of modules and system products under clean room conditions.

hospicall GmbH

Manufacturer

Hospital Equipment, Nurse Call Systems

Founding Year 2004

Employees 53

Director

Dipl. Ing. Hartmut Müller-Solbach

Company Information

hospicall GmbH was founded in July 2004 in Gummersbach.

The focus of our business is the development and manufacturing of practice-oriented and cost-efficient call systems conforming to DIN VDE 0834.

The initial company headquarter could not withstand the increasing requirements. Thus, in August 2009, the company relocated to Wiehl-Bomig. Here, production, stores and a two-storey administration area were perfectly combined under one roof.

Products & Services

Our communication systems P3 and P7 are modern nurse call systems, which conform to DIN VDE 0834 and take account of the increasing economic requirements of today's care environment. Hospicall offers a full range of suitable products for all types of care facilities - from the classic opto-acoustic call system to highly integrated system solutions with digital voice transmission and multimedia.

AKTIVLINE®

interco GmbH

Manufacturer Rehabilitation

Founding Year 1989

Employees 30

Company Information

As a corporation for planning and sale of rehabilitation equipment, our main focus lies on seating and positioning. Our solutions are directed towards people with different physical impairments. Our focus points are customized care systems for challenging demands. Every team has its strengths, every corporation its structure. We are glad that we found our ideal size: more than 30 employees. We are large enough to handle difficult tasks in-house. At the same time we are small enough to take care of any challenge personally.

Products & Services

Dynamic seating: We developed the patented dynamic care concept AKTIVLINE. It includes standardised as well as customized solutions.

Passiv seating: Our special care systems offer an optimized seating position even for complex requirements.

Activ seating: Our solutions for active seating support and stimulate self-mobility.

Accessories: From the head to the feet all needed accessories, therapy tables, different holders and fixations.

Custom-made Products: Our strengths are the development and realisation of individualised care systems.

LUORO GmbH

Manufacturer, Supplier

Dental, Dental Prophylaxis

Founding Year 2015

Employees 2

Company Information

Effective and efficient oral hygiene. We develop, in cooperation with dental scientists, innovative products. We always strive to develop dental products that have a scientifically proven advantage for consumers. Prevention and thinking ahead are the first steps to an effective oral hygiene. Every problem has a potential solution. Our concern is to develop practical solutions with a scientific background to solve these problems.

Products & Services

LUOROWingbrush: Intuitive Cleaning. With the wingbrush the difficulties of interdental hygiene are part of the past. Thanks to its smart and unique feeler technology, you can intuitively find the interdental spaces and just slide from one interdental space to the next one. With the cone-shaped feeler, the wingbrush perfectly adapts to the interdental spaces and its innovative design prevents harms and injuries of the gums.

Clinically proven: The results of the wingbrush were tested in cooperation with the centre for dental and oral medicine of the university of bonn (prof. Dr. M. Frentzen). Its easy handling, intelligent feeler and innovative design enable an effective cleaning process. Even the interdental gaps of the hardly reachable molars (back teeth) can be reached with low effort and without hurting the gums. Interdental brushes are more efficient than floss. They remove more plaque, as their bristles have a bigger surface and thus touch more parts of the gum.

Oncotherm GmbH

Manufacturer, Supplier, Dealer, Service Provider

Intervention/Therapy, Hospital Equipment, Loco-regional Electro-Hyperthermia

Founding Year 1988

Director

Employees 35

Dr. Olivér Szász

Company Information

Complementary medical therapy in the fight against cancer. Oncotherm develops, manufactures and markets cancer treatment systems that apply a nontoxic therapy method and promote the body's natural regulatory processes. The purpose of this complementary medical treatment that is used in combination with therapies from school medicine like radio- or chemotherapy, is to heal cancer, to increase cancer patients' life expectancies and to improve the patients' quality of life. The electro-hyperthermia method, generally referred as "Oncothermia", has become one of the leading Hyperthermia-based therapies in Europe. The Oncotherm group has two locations, one in Hungary and the other in Germany. Oncotherm is constantly working on the development of the method and the devices and is part of the international science discourse. The devices are used all over the world.

Products & Services

The EHY-1000 series is the newest development in the treatment of prostate diseases. Both malignant and benign tumors (BPH) can be treated. The EHY-2000 series is the classic system for locoregional deep Hyperthermia applications and the EHY-3000 series is designed for the simultaneous multi-local treatment of advanced, metastatic disseminated, malignant and solid tumors.
