Cologne Bonn Cargo

Market place

Key facts

Cologne Bonn Cargo ▶

is the name of the unique cargo concept of **Cologne Bonn Airport**.

Objective

With the introduction of this concept we aim to differentiate us from other airports and develop our position as preferred european hub and gateway for freighter flown cargo.

Concept

We are Europe's only airport that provides airlines and forwarding agents with all required logistical services between runway and end-user warehouse. In addition to that we also own and operate an excellent 24/7 non-slot restricted airport infrastructure. The combination of supplying both the infrastructure and the support services makes that we are a hub and gateway rather than merely an airport.

Service portfolio

Our service portfolio includes full cargo- and warehouse handling, european trucking and various sales and logistic support services. All services are provided from the same source as the airport infrastructure. Thus we ensure sustainable quality and the advantage of single source purchasing.

Location

Our home, the Cologne Bonn Cargo Center, offers a direct connection (A 59) to the motorway network – North-South and East-West – as well as a direct access to the apron. Our cargo infrastructure has all the facilities you and your customers require. We are there for you 24/7.

Market place CGN ▶

Cologne Bonn Airport is situated in Germany's largest state, North Rhine-Westphalia (NRW); the backbone and driving force of the German economy.

We are also right in the middle of Europe's largest import and export region for air cargo.

40 % of all central european air cargo imports and exports are generated within a radius of 250 km of Cologne Bonn.

On account of our geographical location, Cologne Bonn Airport offers short trucking distances to all important cargo destinations in Germany the adjacent Benelux countries (Belgium, the Netherlands and Luxembourg) and UK.

This ensures that all major production plants and distribution centres can be efficiently and cost effectively be reached by truck.

Route, Distance,

CGN-LGG 🚛 142 km

CGN-FRA 🚛 160 km

CGN-BRU 🚛 220 km

CGN-AMS 🚛 280 km

CGN-LHR 🚛 636 km

Cologne Bonn Cargo

6 modules for your success

6 modules for your success ▶

Cologne Bonn Airport provides an unique service package for airlines and forwarding companies. In addition to our excellent airport cargo infrastructure, we also provide for an overall logistics service package that comprises every service between our runway and cargo pick-up/drop-off with your end customer.

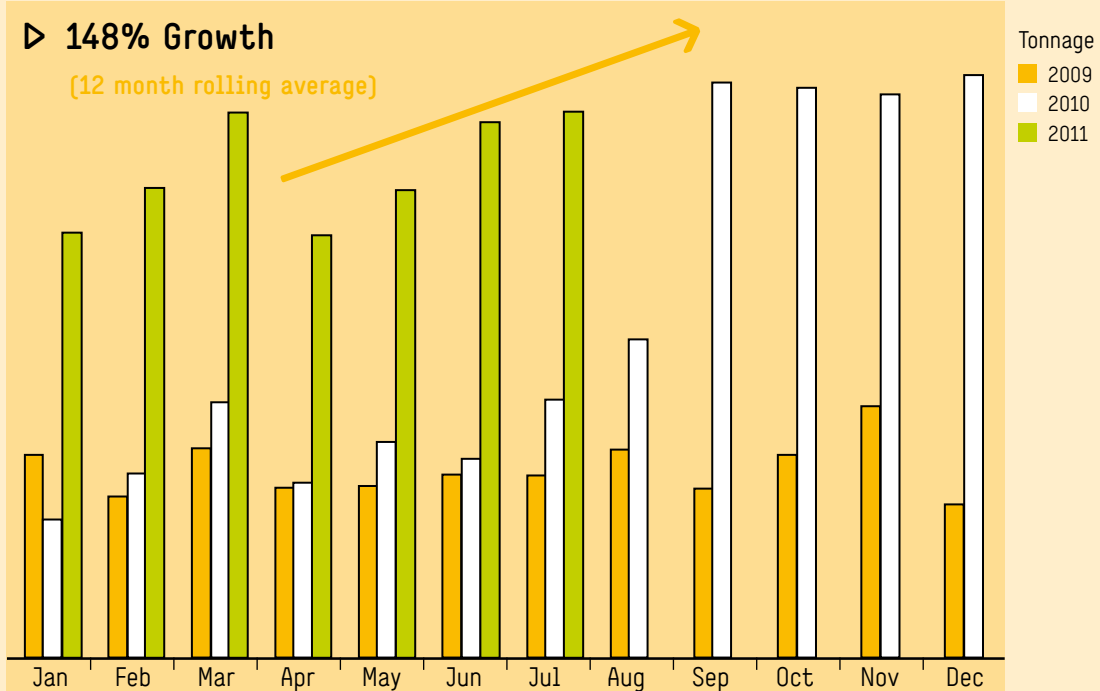

Cologne Bonn Cargo is the brand name of a neutral platform that provides

for these various logistics services, tailored to meet your specific needs.

Why not realise your own hub or gateway in Germany's strongest economic area? Your services and your quality standards, under your own company's name – and all that on a pay-for-use basis.

We are there for you around the clock every day of the year.

Cologne Bonn Cargo
A successful concept

6 modules for your success ▶

6 modules for your success

Cologne Bonn Cargo ✈️

▶ Handling

From aircraft clearance to cargo handling – the entire service package between apron and loading ramp is a one-stop number. A first-class infrastructure and our trained staff are there for you around the clock.

Cologne Bonn Cargo ⚖️

Cologne Bonn Airport (CGN) is your professional partner for EU-perishable imports. CGN has been appointed by the responsible authorities as **Designated Point of Entry** as per Regulation (EC) No. 669/2009 for strawberries and green beans.

In the handling of your consignments the City of Cologne, Department for Environment and Consumer Protection, is the responsible authority for sample taking and documentary control. They work in close cooperation with Cologne Bonn Cargo and have proven – of course within the specifications of the given EU-directive – to be very flexible and customer oriented.

Cologne Bonn Cargo is designated handling agent for Egypt Air Cargo and provides:

- ▶ Aircraft handling
- ▶ Fast transport between apron area and cargo center after unloading of the aircraft
- ▶ Special protection (thermo ULD-covers) against freeze and heat
- ▶ Picking, sorting and packing to customers specifications
- ▶ Computer-controlled cooling facilities (between +4°C and -24°C)
- ▶ Laboratory examination of samples, results available within 12 to 24 hours

Additional services we can provide:

- ▶ Full-European trucking network via local trucking partners
- ▶ Further tailor-made logistic services available (e.g. Sea-Air cargo, AVI etc.)
- ▶ 24/7 customs in-house
- ▶ 34 truck loading bridges plus extra ramp for smaller courier trucks

We are a full dedicated logistics provider for airfreighted fruits and vegetables, mainly specialized in the higher segment fruits. We operate out of Germany and Benelux. We deliver to importers/ supermarkets in the UK and continental Europe.

We fully control the whole process from arrival at European airport up to delivery to the importer / supermarket at destination. Our low-emission lorries are equipped with tracing devices and driven by skilled fruit-drivers. We have daily trucks operating from Cologne Airport.

SkyLine air services is an independent Cargo GSSA, which has been founded in 2011 with branch offices in CGN, DUS, FRA, MUC, AMS. Our mission is to offer our customers a high quality, strong, professional and market oriented product to sell their cargo capacities. SkyLine air services main goal will be from the beginning to represent airlines from different market regions, assuring a high confidence in neutrality and dedication to their product without conflict of interest.
